

Yordanos Yohannes

Full-Stack Developer (3+ years experience)

Building scalable, secure, and user-friendly web applications

1 About Me

I am a full-stack developer with extensive experience building modern web applications using a variety of technologies. I focus on delivering robust, maintainable, and efficient solutions that solve real problems for businesses and users. My approach emphasizes clean code, modular architecture, and best practices across both frontend and backend development. I enjoy working on projects that require problem-solving, innovation, and delivering high-quality results.

2 Core Skills

2.1 Frontend Development

- React.js, Next.js, HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, AngularJS, MySQL

2.2 Backend Development

- Node.js, Express.js, REST APIs, JWT Authentication, tRPC, Better Auth

2.3 Database & Data Management

- MongoDB, Prisma, SQLite, PostgreSQL, Firebase

2.4 DevOps & Tools

- Git, Docker, Vercel, Deployment Automation, n8n Workflow Automation

2.5 Other Expertise

- AI-powered integrations, workflow automation, real-time applications using Socket.IO
- Building scalable and maintainable applications
- Debugging, performance optimization, and problem-solving

3 Selected Projects

3.1 SoserUnion.com (Saving Trend System)

- **Link:** <https://soserunion.com/>
- **Description:** A financial web application for tracking savings trends and user analytics.
- **Technologies:** React.js, Node.js, Express.js, MongoDB
- **Contributions:**
 - Built interactive dashboards for financial insights
 - Implemented secure user authentication and data management

- Developed trend analysis and visualization features

3.2 PlantShop for DMU Students

- **Link:** <https://plantshopereact.netlify.app/>
- **Description:** An e-commerce platform for students to buy and sell plants within the university community.
- **Technologies:** React.js, Node.js, Express.js, Firebase
- **Contributions:**
 - Developed responsive UI and shopping cart system
 - Implemented secure authentication and real-time inventory updates
 - Optimized application for seamless user experience

3.3 BrowseMind Chrome Extension

- **Link:** https://github.com/Yordanos7/Browsemind_chrome_extension
- **Description:** A Chrome extension for managing bookmarks and improving workflow productivity.
- **Technologies:** JavaScript, Chrome API
- **Contributions:**
 - Developed a lightweight, intuitive interface for fast access
 - Organized bookmarks for maximum efficiency
 - Delivered a reliable solution for workflow management

4 What I Bring to Projects

- Full-stack expertise across frontend, backend, and database systems
- Ability to design and implement robust and scalable applications
- Strong focus on clean code, maintainability, and performance
- Experience with AI integrations, real-time applications, and workflow automation
- Skilled in deployment, DevOps, and project automation, ensuring smooth delivery
- Collaborative and communicative approach, keeping stakeholders informed
- Focused on delivering measurable growth and value after the product is launched

5 Professional Philosophy

I build applications that not only work but solve real problems. My development approach balances technical excellence with practical usability, ensuring that every project adds measurable value. I continuously learn and apply the latest technologies to deliver modern, efficient, and user-friendly solutions.
