

Dear Ms. Zatkova,

I am writing to express my strong interest in the PLC Programátor Junior position at your client's esteemed automation company in Prague. As a motivated graduate in Electrical and Control Systems Engineering with a solid foundation in PLC programming, industrial automation, and HMI application development, I am eager to contribute my technical skills and enthusiasm to your innovative team.

During my studies, I gained hands-on experience with Siemens and Allen-Bradley PLCs, HMI/SCADA systems, and automation process design through academic projects and lab-based implementations. I take pride in combining logical problem-solving with creativity to build efficient and reliable control systems. My coursework and project work gave me the opportunity to design and simulate automation logic for manufacturing lines — experiences that developed both my programming discipline and my passion for automation technology.

I am fluent in English (and currently improving my German) and thrive in collaborative environments where continuous learning and teamwork are essential. I also possess a Category B driver's license and am fully open to traveling within the Czech Republic and across Europe to support project commissioning and service tasks.

What excites me most about this opportunity is the chance to work on real industrial automation projects that make a tangible impact — from development and testing to on-site commissioning. I am confident that my adaptability, commitment to quality, and eagerness to learn will make me a valuable member of your client's technical team.

I would be honored to discuss how my background and passion align with your client's goals in more detail. Thank you for considering my application, and I look forward to the opportunity to speak with you soon.

With respect and enthusiasm,

Yordanos Yohans
